

1. Why the name YouCanDoMaths

We have chosen this name because we believe that all people, with the correct teaching, a reasonable amount of work and a positive attitude, can pass Mathematics.

2. Will the program help my child?

Definitely. All our clients who have used YouCanDoMaths regularly and with dedication, have shown remarkable improvement.

The lessons are carefully structured and cover exactly what you need to know. They were authored by experienced South African teachers for South African learners.

You will have access to all the grades, which means you can go back to previous grades and plug any gaps.

You can work at your own pace, virtually anywhere, at any time.

Make sure you read About the Program.

3. How can I improve my maths mark?

- Hard work and more hard work!
- Don't give up.
- Persevere.
- If you don't understand the first time, it doesn't mean that you can't do mathematics.

4. Why is Mathematics a problem for most children?

- Mathematics builds on previous knowledge and many times there are gaps
- Learners lack confidence and are too shy to ask for help
- Large classes make it difficult to give individual attention
- Teachers need to teach at a fast rate to cover the whole curriculum
- Learners fall behind because there is not enough time to absorb and reinforce
- Full extra curricula program leaves little time to attend extra maths lessons
- Extra mathematics lessons are very expensive

5. Why is maths important?

- Mathematics is required for many high skill jobs, which is what we need in South Africa
- Mathematics helps us to reason and think in a logical way
- Success in mathematics builds confidence
- Mathematics opens doors to a broader career choice
- Mathematics is the most widely used subject in the world
